

# Tips to help you shop safely online with your rapid! PayCard

**rapid!**  
PAYCARD

**rapid! PayCard, Visa and merchants work hard to ensure every payment you make is secure - but there are also a few things you can do to make your online experience safe.**

## **Confirm your identity with ease**

Set up methods like finger prints or facial recognition on your phones and within your banking apps. This will give you quick, easy and safe ways to pay online.

## **Look for the “s”**

When paying online, check the URL to ensure it begins with “https://”. The “s” at the end indicates a secure connection.

## **Sign up for transaction alerts**

Stay in the know by signing up to transaction alerts through your mobile banking app. Visa has a “zero liability” policy that may help you get your money back if someone else has fraudulently used your card.

## **Sign up for transaction alerts**

Stay in the know by signing up to transaction alerts through your mobile banking app. Visa has a “zero liability” policy that may help you get your money back if someone else has fraudulently used your card.

## **Beware of phishing scams**

Be careful of unsolicited and suspicious emails or phone calls requesting personal information like passwords or account information. If in doubt, do not click on any links or download files.

## **Take advantage of one-click services**

With some shops you can use one-click-payments. You set up your account details, prove you are the right cardholder, and then you can shop online easily without the need to insert your card details every time.

## **Update your apps and software**

Install the latest software on your computer, tablet or phone which could help protect your information.

The rapid! PayCard® Visa® Payroll Card is issued by MetaBank®, Member FDIC, pursuant to a license from Visa U.S.A. Inc. This card can be used everywhere Visa debit cards are accepted.
